OSC Enders,

Saw your e-mail about the firewater. I just wanted to clarify that they are planning on selling the firewater runoff that they removed from the drainage canal for use in hydraulic fracturing? Please let me know. Thanks. Hope you had a nice weekend!

Subject: Use of waste water in hydraulic fracturing - Region 6

---

Received a call from Chris Ruhl (R6) in accordance with a headquarters request to report hydraulic fracturing related issues.

Last week, R6 responded to a fire (Bachman Service Fire) in Oklahoma City, OK. Approximately 3 million gallons of firefighting water was recovered and is now proposed for use in hydraulic fracturing. The analysis of the waste water shows that contaminants are fairly diluted. Also noted that the firefighting waste water will be required to be managed in accordance with state and local rules.
